PANTONE® Digital Color

iQueue *Simply Brilliant Color Workflow*

Powered by iQueue

Welcome to the powerful iQueue Workflow.

iQueue gives you the resources you need to keep jobs flowing. Automate your process and use on the fly editing to get more work done faster.

All Xanté printers use the iQueue ecosystem, so if you expand your business, you won't have to learn a new program.
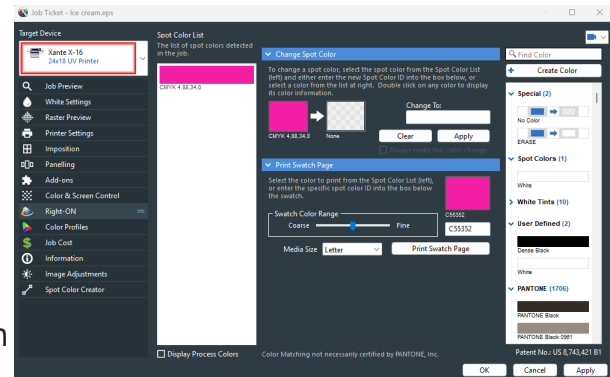

RIGHTON
Patented Spot Color Matching System

RightON® color matching technology makes spot color matching simpler than ever.

Queue easily saves colors for future use and consistency.

With RightON® you can also edit any spot color with CMYK, HSV or RGB color controls.

Accurate Job Cost

Pricing is one of the most important business decisions you will make.

Our accurate job costing lets you know just how much ink each job uses and what it costs.

PANTONE® Color Library

The iQueue spot color database includes the PANTONE® Color Library. This provides access to PMS color builds when using Right-On.

Color/Screen Control

The ultimate solution for fine-tuning your printing process. Gain complete control over every aspect, from half-tone to line screen and even the angle of the half-tone.

From Roll to Real in Minutes

Standardizing on the Epson i3200 printheads, Xanté inks, and the incredible iQueue Workflow, operators move between flatbed and roll jobs seamlessly.

Shops consolidate consumables, maintain a single color standard, and route jobs dynamically—flat rigid today, flexible roll tonight—using the same interface and service model.

Built for uptime
Industrial chassis, smart media handling, and front-to-back access to streamline roll changes and routine maintenance.

Multi-roll efficiency
Load up to 3 rolls simultaneously. Dual-print on 2 rolls in parallel.

Ultra Wide or Dual Roll
Print on one ultra wide roll, or two 60 inch rolls at the same time.
